### What to find in this api

The book you are holding is going to guide you with the procedure and technical specifications required to send sms messages from your website or software using our test message (SmS )platform.

This book's version is 3.0 and as we enrich our services we will make changes to the content. All our partners will be informed of any new services or changes to the specifications described in this book via email or sms , where you will be notified of the URL that can download the newer version.

In case you read this book and need assistance don't hesitate to contact our support department at [support@canadiansms.com](mailto:support@canadiansms.com)

### GENERAL TECHNICAL SPECIFICATIONS

Sending SmS messages from our platform is easy and can be done with almost any programming language that has access to the internet. Our platform accepts variables in POST or GET method, just like the method you would use in a simple form of a website. In order to connect with our platform you will have to create an account in [canadiansms.com](https://canadiansms.com)

For more information please visit the website [canadiansms.com](https://canadiansms.com)
